Tolerance on Length			Up to 3/4", Incl.: -0.03					Over 3/4" to 1-1/2", Incl.: -0.05				

Description	A thread cutting screw with spaced threads, a blunt point, tapered entering threads, a single wide cutting edge, and a chip cavity.					
	Steel	Stainless				
Applications/ Advantages	For molded or through holes in plastics and other soft materials. Provides excellent chip clearing capability.	Stainless screws offer greater corrosion resistance than steel screws but have a more limited range of applications due to being a softer metal. When using any thread-cutting screw, the material in which the threads are cut should have a a lower hardness by 10-20 Rockwell hardness points.				
Material	AISI 1016 - 1024 or equivalent steel.	18-8 stainless steel.				
Heat Treatment	Screws shall be quenched in liquid and then tempered by reheating to 650°F minimum.	18-8 thread-cutting screws are not heat-treated.				
Surface Hardness	Rockwell C45 minimum	-				
Case Depth	No. 4 thru 6 diameter: .002007 No. 8 thru 10 diameter: .004009 1/4" diameter and larger: .005011	-				
Core Hardness (after tempering)	Rockwell C28 - 38	Rockwell B90 - C20				
Plating	Plating See Appendix-A for plating information.
